MC-F

Submersible pumps DOUBLE-CHANNEL with flanged ports

Sewage water
Domestic use
Civil use
Industrial use

- An innovative project by Pedrollo's Research and Development department, has resulted in the new **MC-F**, a complete range of extremely robust and reliable electric pumps.
- Thanks to the enhanced oversizing of the oil-bath electric motor, shaft and bearings, the new **MC-F** electric pumps guarantee an unprecedented service life, with high hydraulic performance, low operating costs and easy maintenance. The oil-bath motor also allows continuous operation of the electric pump, even if partially uncovered.
- They are recommended in all installations for pumping waste water with suspended solid bodies up to 65 mm diameter.
- The **MC-F** series is equipped with a double-channel impeller, ideal for the discharge of large volumes of waste water.

PERFORMANCE RANGE

- Flow rate up to **1600 l/min** (96 m^3/h)
- Head up to **25 m**

APPLICATION LIMITS

- **10 m** maximum immersion depth (with a sufficiently long power cable)
- Maximum liquid temperature **+40 °C**
- Passage of solids:
  – up to **Ø 50 mm** for MC /50-F
  – up to **Ø 65 mm** for MC /65-F
- Minimum immersion depth for continuous service:
  – **320 mm** for MC /50-F
  – **360 mm** for MC /65-F

CONSTRUCTION AND SAFETY STANDARDS

- **10 m** long power cable
- External float switch and control box for single-phase versions

INSTALLATION AND USE

MC-F series pumps, made from heavy gauge robust cast iron, resistant to abrasion and long-lasting, are fitted with a DOUBLE-CHANNEL impeller and are capable of pumping liquids containing short fibred suspended solids. They are ideal for pumping **sewage, waste water, water mixed with mud, groundwater and surface water** in locations such as blocks of flats, public buildings, factories, multi-storey and underground car parks, washing areas, etc.
